AI Heatmap (Grad-CAM Visualization)

AI ANALYSIS

Model Used:	DenseNet121
Possible Finding:	Possible intracranial hemorrhage pattern detected
Confidence Score:	55.13%
Confidence Level:	Low model confidence — manual review strongly recommended

AI ANALYSIS REASON

The trained model identified visual patterns in the image that contributed to the hemorrhage-class prediction. Highlighted Grad-CAM regions indicate areas that influenced the model.

DOCTOR REVIEW

Review Status:	PENDING
Doctor Name:	Pending Radiologist Review
Doctor Notes:	No notes added yet.
